

## School-Based Health Care: We're here for your child's primary care needs.

Your child's physical and mental health are extremely important. We know you have worries about their care and only want the best for them. We want the best for them, too! And we know that health and education go hand in hand; when kids are healthy, they can learn and excel in the classroom.

### Did you know...

- Our mobile unit visits your child's school to provide care, so they won't miss school and you won't miss work! Parents are welcome to join their children for their appointments in person or by phone.
- We're focused on serving you! We will never bill you directly for our services. Our financial counselors will help you get health insurance and address any copays for your child, if needed.
- Children will always receive care in a clean, safe, and private environment on our mobile unit.
- Every child is treated with respect, kindness, and compassion.

Cleveland Clinic Children's School-Based Health Care team is here to help you.

### Note:

A call is made to parents for approval of each mobile unit visit and care is only provided for what a parent authorizes.
