Sustainability Measures

The table below provide definitions of the **Sustainability Improvement Measures** and **Measurement Period.**

1. SBHC client utilization	
Definition	Percentage of unduplicated SBHC clients who had at least one visit to the SBHC during the current school year
Numerator	The number of unduplicated student clients (youth who are enrolled in the school where the SBHC is located) who had at least one visit of any type to the SBHC (Note: This number is cumulative from the start of the school year)
Denominator	Official school enrollment for all school(s)/campuses which the SBHC serves (Note: If the SBHC serves more than one school or is school-linked, report the total school population of all schools served)
Measurement Period	School year (cumulative from the start of the school year)

2. Visits reimbursed by health insurance	
Definition	Percentage of SBHC visits reimbursed by health insurance during the data collection month and the prior two months.
Numerator	Number of SBHC visits of any type reimbursed by health insurance during the data collection month and the prior two months
Denominator	Total number of SBHC visits of any type during the data collection month and the prior two months
Measurement period	***Three months of data-*** e.g., if reporting for April monthly data the data collection measurement period is February 1 – April 30

3. Provider efficiency (applies to primary care, behavioral health, and health education)	
Definition	Percentage of total available visit slots used by provider(s) during the data collection month
Numerator	Total number of visits completed for provider type in the reporting month
Denominator	Number hours available for visits for provider type in the reporting month. *Do not include hours spent in non-clinical activities such as lunch, meetings, outreach, or administration. The number of hours available may vary slightly by month, due to unequal number of days/weeks in each month, provider time off, and other factors.*
Measurement period	***One month of data -*** For all provider efficiency measures, report one month of data, e.g., data reported in April would represent visit/hours data for March 1-31.
